

MAINTENANCE ADVICE

FOR DIRESCO MINERAL COMPOSITE KITCHEN WORKTOPS

1. Normal cleaning

Immediately after staining or use, clean with water and a clean, damp microfiber cloth. Dry afterwards with a clean kitchen cloth.

2. Daily/general cleaning

Spray on Diresco Mineral Surface Cleaner, clean with a clean, damp microfiber cloth. Dry with a clean kitchen cloth.

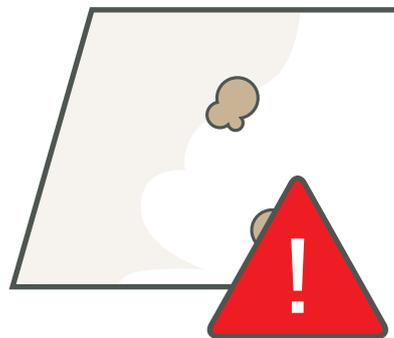

3. Thorough/periodic cleaning

Recommended products

- Akemi: Quartz Intensive Cleaner
- Lithofin: MN Power-Clean
- Moeller: HMK R185

(For correct use, please refer to these manufacturers' websites).

Attention

- Only use products with a Ph value of 3 to 10
- First try a product on a less prominent part of the worktop

Abrasives, scouring pads, solvents (acetone, benzene,...), aggressive chemicals (oven cleaner, plunger,...), dishwasher detergents, etc. can damage the worktop.

Always treat the material with respect. It doesn't clean itself!
